56.64	10	Jordan PALIN		0
FINAL	13	Sam STEAD		1

I hope you all enjoy tonight's entertainment...the end of an era here at the Abbey. Tonight, for the first time in Britain, you'll see in demonstration races what could be the beginning of a new era with a custom Jawa motor in a modern chassis performing around the wide open spaces here. I can't begin to explain the finer details in the limited space we have, but it's a production motor with a difference - there is NO tuning, NO aftermarket parts allowed, you just buy and ride! It's perfect for entry-level racers, as it has a cap on the price and all the parts are the same, so in effect it will be the best rider who prevails – and wins. So far these engines will have been thrashed for over a year and we've never replaced a part in them yet! So only time will tell the amount of savings there could be for the new speedway blood.... For more details keep your ears and eyes open for New Speedway Foundation!!!

Sam Ermolenko

Many thanks go to the following people for helping us get this project to the stage it is now:

Revolution Speedway - for their chassis tonight
Jawa NSF - for the motors
Terry Russell & Swindon Speedway - for the track
Speedway Star - for the article
Brian Burford - for his time!
